This change is a good one !
You can now get things done
in a better way than ever.

"IT" is no longer restricted to any
particular sector of business.
It can very easily enter your way
of working and get the best out of it.

So don't think Software is only for
corporate people or only big
business houses get their systems
fully computerized.

Get into a big league, Go for IT !

We are a group of programmers and designers backed by experienced analysts,
with background of degrees in computer education and market knowledge,
we strive to make new things in IT field. Its true IT is changing for you.

SO MAKE MOST OF YOUR COMPUTERS

Founded in 2000, we have a hold of trends in software and hardware in market.
Following those trends we have multiplied our range of services in this industry.
The company surfs through **Networking** and **Security** solutions too,
besides being the maestro in **Software** and **Hardware**.

Our CISA & CISSP staff bring to market **integrated solutions** required to solve
customers IT and Security challenges.

We provide online **ticket management** and proactive monitoring services.
Let us concentrate on your IT needs while you focus on business. Good deal !

Newly, we have coined a team which deals with professional **design** for you.
Our label for design front has a fab name '**Dots n Pixels**'.
